## What is this product?

### Type

This is an investment fund established as a Company With Variable Capital (SICAV).

### Objectives

**Investment objective** The Sub-Fund seeks to provide long-term capital growth through investments in shares of companies with varying market capitalisation domiciled in the European Union, Switzerland, Norway and Iceland and listed on any Regulated Market of an OECD country. The Sub-Fund has a value and growth strategy. The Sub-Fund aims to identify and invest in stocks that are undervalued compared to theoretical fair values, whilst having sound financial and economic fundamentals and also aims to identify stocks with growth potential. Investments in growth stocks may be more volatile as their market prices tend to reflect future expectations.

**Investment policies** The Sub-Fund will invest primarily in common stocks, preferred shares and bonds convertible into common stocks, of companies across a range of industries. The Sub-Fund may also invest in cash and money market instruments for investment purposes.

The Sub-Fund can have up to 20% of its net assets in ancillary liquid assets. In addition, the Sub-Fund may use the following techniques and instruments to achieve its investment objective and for the purpose of efficient portfolio management and for the purpose of providing protection against market and exchange risks: transactions relating to financial futures, warrants and options. The Sub-Fund may also enter into interest rate transactions.

Transaction costs on portfolio assets of the Sub Fund affect its performance.

**Benchmark** The Sub-Fund is actively managed. The Sub-Fund is not managed in reference to a benchmark.

**Redemption and Dealing** Subscriptions and redemptions are daily. Redemption orders received by the Registrar Agent on any Dealing Day are executed on the next business day.

**Distribution Policy** Income generated by the Share Class is reinvested.

**Launch date** The Sub-Fund was launched on 17/03/2003. The share class was launched on 31/03/2003.

**Fund Currency** The base currency of the sub-fund is the EUR.

**Switching between Sub-Funds of NBG International Funds Sicav** Switching between share classes of NBG International Funds Sicav is not permitted. Switching between sub-funds is permitted provided the shareholder meets the requirements of the destination share class. For full details please refer to the Prospectus.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Performance scenarios

The figures shown include all the costs of the product itself, and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between 31 March 2015 and 31 March 2020.

Moderate: this type of scenario occurred for an investment between 31 October 2014 and 31 October 2019.

Favourable: this type of scenario occurred for an investment between 29 March 2019 and 28 March 2024.

What happens if the Sub-Fund is unable to pay out?

If we are not able to pay you out what we owe you, you are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depositary. Should we default, the depositary would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 EUR is invested.

We have classified this product as 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity of the Sub-Fund to pay you.

Be aware of currency risk. In some circumstances, you may receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Beside the risks included in the risk indicator, other risks may affect the fund performance. Please refer to the fund prospectus, available free of charge at <http://www.nbgam.lu>.

	If you exit after 1 year	If you exit after 5 years
<b>Total Costs</b>	<b>797 EUR</b>	<b>2,514 EUR</b>
<b>Annual cost impact*</b>	<b>8.0%</b>	<b>5.1% each year</b>

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 8.0% before costs and 2.9% after costs.
